

CleanFreak® High-Speed Floor Burnisher

20" High-Speed Floor Burnisher with
1.5 HP A.C. Motor - 1500 RPM

Item#
KOB-00-4430-5

Polish with Maximum Shine

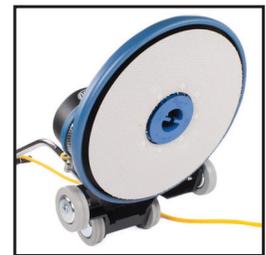

The CleanFreak 1500 RPM fixed handle burnisher is powered by a 1.5 HP A.C. motor with twin capacitors. The A.C. style motor is rated to run up to five times longer than normal D.C. powered burnishers. Thanks to the A.C. motor, the machine will never attempt to overwork itself and will actually cut out if you apply too much load to the head. To help extend the motor's lifespan, the machine will cut out when it starts to draw excessive amps. This cut-out will persist until you reduce the pressure on the head and allow the amp draw to return to normal. The 20-inch head was designed to effortlessly glide over floors for polishing purposes.

Product Features:

- ✓ 1500 RPM high-speed machine
- ✓ 20" burnishing path with 1.5 HP A.C. motor
- ✓ Runs on standard 15-amp circuit
- ✓ Belt drive
